

## INDEX OF SUBJECTS

### A

- Abnormal endocervical cells, 708
- ABO blood type, expression of epidermal growth factor receptor in invasive transitional cell carcinoma of urinary bladder, 166
- Acetest, follow-up testing for ketonuria, 346
- Acetonuria, follow-up testing for ketonuria, 346
- Acid-fast bacilli, detection of *Mycobacterium avium-intracellulare* complex in bone marrow specimens of patients with AIDS, 446
- Acquired immunodeficiency syndrome. *See also* Human immunodeficiency virus
- accuracy and cost-effectiveness of one-tube, three-color method for obtaining absolute CD4 counts and CD4:CD8 ratios, 279
  - detection of *Mycobacterium avium-intracellulare* complex in bone marrow specimens of patients with, 446
  - Howell-Jolly body-like inclusions in neutrophils of patients with, 429
  - immunophenotypic and genotypic analysis of AIDS-related non-Hodgkin's lymphomas, 773
  - mycobacterial spindle-cell pseudotumor of spleen in, 539
  - Mycobacterium genavese* infections in, 95
- Activated platelets, reaction of autoimmune antibody in patient with idiopathic thrombocytopenic purpura to, 370
- Adenocarcinoma
- differentiation from reactive and neoplastic mesothelial cells in serous effusions by Ber EP4, comparison with CEA, B72.3, and Leu-M1, 387
  - endocervical, abnormal endocervical cells and, 708
  - metastatic, crystalloids in metastatic prostatic adenocarcinoma, 266
  - prostate-specific antigen staining in nonprostatic mucinous adenocarcinomas, 381
  - prostatic
    - crystalloids in metastatic prostatic adenocarcinoma, 266
    - neuroendocrine differentiation of prostatic adenocarcinoma in radical prostatectomy specimens, 382
    - well-differentiated, arising from mature cystic teratoma of mediastinum, 531
- Adenoid cystic carcinoma, of Bartholin's gland, tubular variant of, 204
- Adenomatous hyperplasia, atypical, differential diagnosis of prostatic carcinoma, 48
- Adenosis, differential diagnosis of prostatic carcinoma, 48
- Adenovirus, latex agglutination assays in diagnosis of pediatric viral gastroenteritis, 742
- Adhesion molecules, cellular and immunologic changes in skin of allogeneic bone marrow recipients, clinical and histologic features of acute graft-versus-host disease related to, 597
- Adrenocortical neoplasms, 557
- correlation of pathologic features with clinical outcome in children, 625
- Afpia felis*, monoclonal antibodies to, 603
- Age
- detection of human papillomavirus by polymerase chain reaction in squamous cell carcinomas of lung of young versus old patients, 375
  - racial and age-related differences in incidence and severity of focal autoimmune thyroiditis, 698
- AgNOR silver stain
- cell kinetic analysis of interleukin-2 receptor-tested chronic lymphocytic leukemia using, 300
  - diagnostic value of silver nucleolar organizer region assessment in breast cytology, 689
- AIDS. *See* Acquired immunodeficiency syndrome
- Allele-specific loss, expression of histocompatibility-related leukocyte antigens in pathway to cervical carcinoma, 5
- Allergy, impaired allergen-specific IgG response to allergen immunotherapy in chronic fatigue syndrome, 394
- Allogeneic blood transfusion, impact of autologous blood ordering and blood procurement practices on allogeneic blood exposure in elective orthopedic surgery patients, 354
- Anatomic pathology, outbreak of *Hantavirus* pulmonary syndrome in Southwestern United States, S1
- Anemia
- of chronic disease, serum levels of erythropoietin and selected other cytokines in, 338
  - identification of refractory anemia and refractory anemia with ringed sideroblasts using red cell volume distribution width, 391
  - sickle cell, parvovirus B19 DNA during aplastic crisis in adults with sickle cell anemia, 394
- Aneuploidy
- flow cytometric evidence of aneuploidy in non-neoplastic testicular tissue, 397
  - spurious, two-color multiparametric method for flow cytometric DNA analysis, 630
- Anti-A60-IgG, discriminant analysis to assess disease activity in pulmonary tuberculosis with a panel of specific and nonspecific serum markers, 719
- Anti-A60-IgM, discriminant analysis to assess disease activity in pulmonary tuberculosis with a panel of specific and nonspecific serum markers, 719
- Antibody detection testing, omission of 37°C reading from pretransfusion red blood cell antibody detection, 361
- Anticarbonic anhydrase, in sera from patients with endometriosis, 611
- Anticardiolipin antibodies, Fifth International Anticardiolipin Symposium wet workshop, 616
- Anticoagulants, failure to generate comparable international normalized ratio values using thromboplastins from five sources in parallel studies of patients receiving oral anticoagulants, 391
- Antigen detection systems, effects of nonclassic pediatric bacterial pathogens in the usefulness of the Directigen latex agglutination test, 729
- Antimicrobial susceptibility testing, application of new technology to detection, identification, and antimicrobial susceptibility testing of mycobacteria, 329
- Anti-myeloperoxidase antibody, acute myelogenous, 388
- Antineutrophil cytoplasmic antibody test, ANCA Instructor, an image-based personal computer program that teaches, 395

- Anti-myeloperoxidase antibody, acute myelogenous, 388
- Antineutrophil cytoplasmic antibody test, ANCA Instructor, an image-based personal computer program that teaches, 395

## Antinuclear antibodies

- ANA-QA, a personal computer program that monitors ability to interpret antinuclear antibody tests, 395
- lupus erythematosus cell test, 65

## Antiphospholipid antibodies, Fifth International Anticardiolipin Symposium wet workshop, 616

## Antiphospholipid syndrome, Fifth International Anticardiolipin Symposium wet workshop, 616

 $\alpha$ -1 Antitrypsin

- $\alpha$ -1 antitrypsin immunoperoxidase staining in cirrhotic livers, 384
- polymerase chain reaction-mediated, site-directed mutagenesis detection of Z and S  $\alpha$ -1 antitrypsin deficiency in family members, 398

Apheresis, need for secondary leuko-filtration on single-donor apheresis platelets with white blood cell counts greater than  $400 \times 10^6$  cells/unit, 393

## Apolipoprotein A-I, relative usefulness of automated apolipoprotein A-I and high-density lipoprotein cholesterol assays as markers for coronary artery disease, 104

## Arterial thrombosis, pulmonary thrombosis in 10-year-old child with minimal change disease and nephrotic syndrome, 230

## Astrocytomas, grading of astrocytomas using image analysis, 397

## Atypical adenomatous hyperplasia, differential diagnosis of prostatic carcinoma, 48

## Atypical squamous cells of undetermined significance

- abnormal endocervical cells, 708
- in Papanicolaou smears, cytohistologic correlation and biopsy diagnostic distribution and, 383

## Auto-antibodies, autoimmune antibody in patient with idiopathic thrombocytopenic purpura, reaction to platelet low molecular weight glycoproteins and activated platelets, 370

## Autoimmune thyroiditis, racial and age-related differences in incidence and severity of focal, 698

## Autoimmunity, carbonic anhydrase antibody in sera from patients with endometriosis, 611

## Autologous blood transfusion

- donation for
  - amount of, 249
  - impact of autologous blood ordering and blood procurement practices on allogenic blood exposure in elective orthopedic surgery patients, 354
  - preoperative, quality issues, 392
- in vitro analysis of shed blood from patients undergoing total knee replacement surgery, 365

## Automated methods

- assay of heparin cofactor II on Medical Laboratory Automation 900C, 391
- automatic balancing centrifuge, 399
- comparison of automated and manual urine microscopy in pediatric patient population, 388
- comparison of Baxter MicroScan Yeast Identification Panel and Vitek Yeast Biochemical Card, 438
- cytology automation, 121
- detection rate of abnormal cervical cytologic specimens using Thin-Prep processor, 209
- evaluation of automated reticulocyte counts and their reliability in the presence of Howell-Jolly bodies, 85
- laboratory comparison of automated instruments with standard Westergren method for erythrocyte sedimentation rate, 390
- optimal protocol for processing high-volume and Peds Plus blood cultures by the BACTEC NR860, 162
- screening, PAPNET cytologic screening system for quality control of cervical smears, 220

## Autonomously functioning nodule of thyroid, 29

## Autopsy

- Hantavirus* pulmonary syndrome outbreak in Southwestern United States, S1
- Mycobacterium genavese* infections in AIDS, 95

## B

- B72.3, differentiation from reactive and neoplastic mesothelial cells in serous effusions by Ber EP4, comparison with CEA, B72.3, and Leu-M1, 387

Bacillus Calmette Guerin, detection of *Mycobacterium avium-intracellulare* complex in bone marrow specimens of patients with AIDS, 446

## BACTEC NR860, optimal protocol for processing high-volume and Peds Plus blood cultures by, 162

## Bacteremia, optimal protocol for processing high-volume and Peds Plus blood cultures by the BACTEC NR860, 162

## Bacterial antigen detection systems, effects of nonclassic pediatric bacterial pathogens in the usefulness of the Directigen latex agglutination test, 729

## Bacterial identification

- rapid manual bacterial identification for less than \$4.00, 393
- reproducibility of identification systems for biotyping of coagulase-negative staphylococci, 443

Bacterial infections. *See also specific infections*

- enteric, practical considerations in laboratory diagnosis of, S14

## Barrier gels, absorption of therapeutic drugs by barrier gels in serum separator blood collection tubes, 456

## Bartholin's gland, tubular variant of adenoid cystic carcinoma of, 204

## Baxter MicroScan Yeast Identification Panel, comparison with Vitek Yeast Biochemical Card, 438

Bayesian analysis, utility and role of rapid Grocott's methenamine silver stain in diagnosis of *Pneumocystis carinii* using, 378*bcl-2* oncogene

- rearrangement in Hodgkin's disease and reactive lymph nodes, 756
- role in Hodgkin's disease, 681

## Beckman array nephelometric method, comparison with Behring RapiTex method for quantitation of rheumatoid factor, with cost evaluation and reflex testing algorithm, 394

## Becton Dickinson FACScan Flow Cytometer/FACSlyse System, comparison with Coulter XL Flow Cytometer/Multiprep System, 397

## Behring RapiTex

- comparison with Beckman array nephelometric method for quantitation of rheumatoid factor, with cost evaluation and reflex testing algorithm, 394
- comparison with Kallestad QM300 latex tube method for quantitation of rheumatoid factor, with clinical correlation, 394

## Benzoylcegonine

- in meconium of premature infants exposed to cocaine in utero, 387
- thin-layer chromatographic detection of cocaethylene in human urine, 342

## Ber EP4, differentiation from reactive and neoplastic mesothelial cells in serous effusions by Ber EP4, comparison with CEA, B72.3, and Leu-M1, 387

## Biopsy

- atypical squamous cells of undetermined significance in Papanicolaou smears, cytohistologic correlation and biopsy diagnostic distribution and, 383
- fine needle. *See* Fine-needle aspiration

- liver, lack of correlation of mean alanine amino transfer levels before liver biopsy with Knodell score on liver biopsy in chronic hepatitis, 384
- Bladder cancer, expression of epidermal growth factor receptor in invasive transitional cell carcinoma of urinary bladder, 166
- Bleeding time  
comparison of platelet force development, new measure of platelet function, and bleeding time in long-term hemodialysis patients, 392  
quality assurance of, 392
- Blood  
blood T-cell quantitation, comparison of color methods of the Coulter XL Flow Cytometer/Multiprep and the Becton Dickinson FACScan Flow Cytometer/FACSLyse Systems, 397  
morphologic and quantitative changes in blood and marrow cells following growth factor therapy, 67  
peripheral. *See* Peripheral blood
- Blood culture, optimal protocol for processing high-volume and Peds Plus blood cultures by the BACTEC NR860, 162
- Blood transfusions  
allogenic, impact of autologous blood ordering and blood procurement practices on allogenic blood exposure in elective orthopedic surgery patients, 354  
autologous. *See* Autologous blood transfusion  
need for secondary leuko-filtration on single-donor apheresis platelets with white blood cell counts greater than  $400 \times 10^6$  cells/unit, 393  
omission of  $37^\circ\text{C}$  reading from pretransfusion red blood cell antibody detection, 361  
satellite blood bank laboratory, 393  
statistics, quality issues, 392  
in vitro analysis of shed blood from patients undergoing total knee replacement surgery, 365
- Bone marrow  
CD34 immunopositivity in paraffin-embedded bone marrow sections, complications with flow cytometry results, 376  
CD34 immunostaining of bone marrow biopsy specimens as reliable way to classify phases of chronic myeloid leukemia, 426  
cellularity, as predictor of adequate cell yield for transplantation, 81  
comparison of bone marrow and hematologic findings in patients with HIV infection and those with myelodysplastic syndromes and infectious diseases, 123  
comparison of techniques for detection of lymphoma in bone marrow specimens, 390  
discrepant morphologic features in bone marrow involvement by malignant lymphomas, gene rearrangement patterns in diagnosis, 388  
findings in patients receiving FK-506 therapy, 390  
involvement in large-cell lymphoma: prognostic implications of discordant disease, 305  
L3 acute lymphoblastic leukemia, 130  
marrow cellularity as predictor of adequate cell yield for transplantation, 81  
transplantation, morphologic and quantitative changes in blood and marrow cells following growth factor therapy, 67
- Borrelia burgdorferi* infections, evaluation of media for transport of tissues infected with *Borrelia burgdorferi*, 154
- Breast cancer  
applicability of keratin 7 monoclonal antibody in routinely Papanicolaou-stained cytologic specimens for differential diagnosis of carcinomas, 257  
application of Scarff-Bloom-Richardson tumor grading system to fine-needle aspirates of breast, 262  
CA549 as marker for, 465  
comparative staining of ductal carcinoma of breast by monoclonal antibodies used in imaging and therapy, 381  
comparison of Ki-67 with proliferating cell nuclear antigen in formalin-fixed paraffin-embedded breast carcinomas, 380  
comparison of proliferation rates in breast cancers by Ki-67 and S-phase, 380  
correlation of heat shock protein 70 expression with estrogen receptor levels in invasive human breast cancer, 519  
detection of Ki-67 by immunohistochemistry in fine needle aspirates of breast carcinoma, correlation with S-phase fraction by flow cytometric analysis, 380  
diagnostic value of silver nucleolar organizer region assessment in breast cytology, 689  
ductal  
application of Scarff-Bloom-Richardson tumor grading system to fine-needle aspirates of breast, 262  
comparative staining of ductal carcinoma of breast by monoclonal antibodies used in imaging and therapy, 381  
evaluation of *c-erbB-2* amplification in breast carcinoma by differential polymerase chain reaction, 493  
intratumoral heterogeneity of DNA ploidy in breast carcinomas, flow cytometric assessment of sampling techniques, 379  
male  
DNA ploidy analysis in, 380  
oncogene amplification and expression in male breast cancer, 375  
oncogene amplification and expression in male breast cancer, 375  
organization of DNA analysis of formalin-fixed, paraffin-embedded tissue to study breast carcinoma, 398
- Breast lesions  
diagnostic value of silver nucleolar organizer region assessment in breast cytology, 689  
early diagnosis and management of mammographically detected nonpalpable breast lesions, combined use of stereotactic needle biopsy and grading of abnormal mammograms in, 381  
false results in fine needle aspirates of, 379  
papillary, cytomorphologic study of, 500
- Bromodeoxyuridine, in vitro bromodeoxyuridine labeling of malignant neoplasms, comparison with flow cytometry cell-cycle analysis, 703
- Bronchial neoplasms, papillary variant of low-grade mucoepidermoid carcinoma, 269
- Bronchoalveolar lavage, cost utility of Gomori methenamine silver stains in bronchoalveolar lavage specimens, 378
- Brunner's gland hamartoma, clinicopathologic correlations, 385
- Burkitt's lymphoma, S27  
L3 acute lymphoblastic leukemia compared with, 130

## C

- CA549, as breast cancer marker, 465
- Calcification, mineralizing pulmonary elastosis in chronic cardiac failure, 22
- Cancer. *See also* Carcinoma; *specific cancers*  
breast. *See* Breast cancer  
gastrointestinal. *See* Gastrointestinal cancer  
genitourinary, synoptic templates for surgical pathology reporting of, 398  
of lung. *See* Lung cancer  
malignant transformation in primary lymphoma and Paget's disease of femur, 783  
markers for  
application of Scarff-Bloom-Richardson tumor grading system to fine-needle aspirates of breast, 262

- CA549 as breast cancer marker, 465  
clonal analysis of posttransplant lymphoproliferative disorders using both episomal Epstein-Barr virus and immunoglobulin genes as markers, 590  
metastatic. *See* Metastatic disease  
ovarian. *See* Ovarian cancer  
prostatic. *See* Prostate cancer  
renal-cell, immunohistochemical reactivity and histogenesis of renal-cell carcinoma, 382  
sensitivity comparison of two and four slides in the cytologic examination of sputa for malignancy using the Saccamanno technique, 378  
in vitro bromodeoxyuridine labeling of malignant neoplasms, comparison with flow cytometry cell-cycle analysis, 703  
Capillary electrophoresis, profiling of plasma anions by, 387  
Carbonic anhydrase isozymes, carbonic anhydrase antibody in sera from patients with endometriosis, 611  
Carcinoembryonic antigen, differentiation from reactive and neoplastic mesothelial cells in serous effusions by Ber EP4, comparison with CEA, B72.3, and Leu-M1, 387  
Carcinoma. *See also* Cancer; specific carcinomas  
adenocarcinoma. *See* Adenocarcinoma  
adenoid cystic, of Bartholin's gland, tubular variant of, 204  
cervical, expression of histocompatibility-related leukocyte antigens in pathway to, 5  
lobular, cellularity of lobular carcinoma and problems of fine needle aspiration diagnosis, cytohistologic study of, 379  
mucoepidermoid, low-grade, papillary variant of, 269  
papillary. *See* Papillary carcinoma  
rapid staining method for two-color multiparametric DNA flow cytometric analysis of carcinomas using staining for cytokeratin and leukocyte common antigen, 638  
squamous. *See* Squamous carcinoma  
transitional cell. *See* Transitional cell carcinoma  
tubular, fine-needle aspiration cytology of tubular carcinoma, with mammographic correlation, 488  
Cardiac failure, mineralizing pulmonary elastosis in chronic cardiac failure, 22  
Cardiolipin, incidence of antiphospholipid antibodies in patients with monoclonal gammopathy of undetermined significance, 471  
Cardiopulmonary resuscitation, troponin-I in diagnosis of myocardial infarction following, 376  
CAS 200, lymphoid-rich effusions and, 526  
Castleman's disease, molecular genetic, cytogenetic, and immunophenotypic analyses in Castleman's disease of plasma cell type, 290  
Cathepsin-D, localization of anti-Leu-M1 (CD15) binding sites in Hodgkin's disease by immunoelectron microscopic examination, 140  
Cat scratch disease  
monoclonal antibodies to *Afpia felis*, 603  
morphologically variable bacilli of, identification by immunocytochemical labeling with antibodies to *Rochalimaea henselae*, 607  
CD4 lymphocytes, accuracy and cost-effectiveness of one-tube, three-color method for obtaining absolute CD4 counts and CD4:CD8 ratios, 279  
CD14 (MY4), expression of CD24 (BA-1) predicts monocytic lineage in acute myeloid leukemia, 296  
CD15, localization of anti-Leu-M1 (CD15) binding sites in Hodgkin's disease by immunoelectron microscopic examination, 140  
CD24 (BA-1), expression of CD24 (BA-1) predicts monocytic lineage in acute myeloid leukemia, 296  
CD34  
chronic myeloid, 426  
immunopositivity in paraffin-embedded bone marrow sections, complications with flow cytometry results, 376  
CD68, immunoreactivity of CD-68 (KP1, macrophage-associated antigen) for malignant melanoma and neural tumors, 386  
Cell cycle  
DNA flow cytometric analysis of hemangiopericytoma, 181  
heterogeneity of neoplastic and reactive cell proliferation in non-Hodgkin's lymphomas linked to patent survival, 413  
in vitro bromodeoxyuridine labeling of malignant neoplasms, comparison with flow cytometry cell-cycle analysis, 703  
Cell kinetics, statin as marker of nonproliferation, 421  
Cell size, cytologic grading of aggressive and nonaggressive variants of papillary thyroid carcinoma, 651  
Cell surface antigen, measurement of intensity of cell surface antigen expression in B-cell chronic lymphocytic leukemia, 312  
Cellular proliferation. *See* Proliferation  
Centrifuge  
automatic balancing centrifuge, 399  
cyto-centrifuge, preparation of peripheral blood for detection of *Plasmodia* using, 377  
c-erbB-2  
correlation of heat shock protein 70 expression with estrogen receptor levels in invasive human breast cancer, 519  
evaluation of c-erbB-2 amplification in breast carcinoma by differential polymerase chain reaction, 493  
Cerebrospinal fluid pathogens, effects of nonclassical pediatric bacterial pathogens in the usefulness of the Directigen latex agglutination test, 729  
Cervix  
cervical intraepithelial neoplasia, of uterine cervix, morphology, 508  
cervicovaginal smears, 1  
adequacy of one-slide cervical smear in detection of squamous intraepithelial lesions, 647  
detection rate of abnormal cervical cytologic specimens using ThinPrep processor, 209  
expression of histocompatibility-related leukocyte antigens in pathway to cervical carcinoma, 5  
homogeneous sampling accounts for increased diagnostic accuracy using ThinPrep processor, 215  
invasive squamous carcinoma and cervical intraepithelial neoplasia III of, 508  
PAPNET cytologic screening system for quality control of cervical smears, 220  
Chemistry samples, frost-free versus nonfrost-free freezers for long-term storage of, 399  
Children  
comparison of automated and manual urine microscopy in pediatric patient population, 388  
correlation of pathologic features with clinical outcome in pediatric adrenocortical neoplasia, 625  
latex agglutination assays in diagnosis of pediatric viral gastroenteritis, 742  
use of semiquantitative HIV 1 culture to guide therapy in a premature infant, 753  
Chondroid chordoma, 36  
Chondrosarcoma, 36  
Chordoma, chondroid, 36  
Chromatin, cytologic grading of aggressive and nonaggressive variants of papillary thyroid carcinoma, 651  
Chromosomal translocation, bcl-2 rearrangement in Hodgkin's disease and reactive lymph nodes, 756  
Chronic disease, anemia of, serum levels of erythropoietin and selected other cytokines in, 338

- Chronic fatigue syndrome, impaired allergen-specific IgG response to allergen immunotherapy in, 394
- Cirrhosis,  $\alpha$ -1 antitrypsin immunoperoxidase staining in cirrhotic livers, 384
- Clinical outcome, correlation of pathologic features with clinical outcome in pediatric adrenocortical neoplasia, 625
- Clinical pathology, outbreak of *Hantavirus* pulmonary syndrome in Southwestern United States, S1
- Clonality, clonal analysis of posttransplant lymphoproliferative disorders using both episomal Epstein-Barr virus and immunoglobulin genes as markers, 590
- Coagulopathy, in vitro analysis of shed blood from patients undergoing total knee replacement surgery, 365
- Cocaethylene, thin-layer chromatographic detection of cocaethylene in human urine, 342
- Cocaine  
benzoylecgonine in meconium of premature infants exposed to cocaine in utero, 387  
thin-layer chromatographic detection of cocaethylene in human urine, 342
- Coding, performance analysis of manual and automated systemized nomenclature of medicine (SNOMED) coding, 253
- Cofactor, incidence of antiphospholipid antibodies in patients with monoclonal gammopathy of undetermined significance, 471
- Collagen disease, plasma thrombomodulin as marker of vascular injuries in collagen vascular diseases, 109
- Colon cancer, applicability of keratin 7 monoclonal antibody in routinely Papanicolaou-stained cytologic specimens for differential diagnosis of carcinomas, 257
- Colorectal carcinoma, analysis of risk factors in young patients with, 384
- Columbia medium, evaluation of media for transport of tissues infected with *Borrelia burgdorferi*, 154
- Compensation standards, two-color multiparametric method for flow cytometric DNA analysis, 630
- Computers  
ANA-QA, a program that monitors ability to interpret the antinuclear antibody test, 395  
ANCA Instructor, an image-based program that teaches antineutrophil cytoplasmic antibody test, 395  
computer-assisted teaching, innovative interactive videodisc units for teaching of pathology laboratory cases, 665  
diagnosis-finding program for soft tissue, 398  
performance analysis of manual and automated systemized nomenclature of medicine (SNOMED) coding, 253  
visualization of laboratory performance, 395
- Coronary artery disease, relative usefulness of automated apolipoprotein A-I and high-density lipoprotein cholesterol assays as markers for, 104
- Coronary lesions, lack of prediction creatine kinase-MB elevation, 388
- Correlation, immunophenotyping of lymphoma by fine-needle aspiration, comparative study of cytospin preparations and flow cytometry, 569
- Cost containment  
cost constraints and tissue sampling, 247  
cost utility of Gomori methenamine silver stains in bronchoalveolar lavage specimens, 378  
optimal protocol for processing high-volume and Peds Plus blood cultures by the BACTEC NR860, 162
- Coulter XL Flow Cytometer/Multiprep, comparison with Becton Dickinson FACScan Flow Cytometer/FACSlyse System, 397
- Counts, diagnostic value of silver nucleolar organizer region assessment in breast cytology, 689
